

SOFTWARE DEVELOPER JOB DESCRIPTION

We are looking for a candidate to fill software developer position, participate in the analysis and composition of requirements, design of architectural and component software features, design and implementation of systems and mobile applications, design and implementation of test plan and documentation of final product.

Located in the heart of Dar es salaam, Thinkers Technologies, is a technology company with a focus in mobile applications, Internet of Things (IoT), FinTech and software production committed to **making our developers as successful as possible.**

Our process includes RESEARCH & DESIGN THINKING throughout every step of development to ensure technical and business feasibility of each project.

RESPONSIBILITIES

Position requires creating and maintaining web services, mobile applications and servers that interact with complex database and implement precise business logic. Candidates with experience in telecommunication and financial industry will be given preference.

Languages

Develop applications written in Object oriented PHP, C++ and/or Java. Initial duties will include reviewing code, writing documentation and following security procedures in deploying and implementing produced software. Additional knowledge in JavaScript, Perl, NodeJS, Ruby and other languages will be considered an added advantage.

Moreover, you are required to be able to adapt to new languages, methodologies and platforms to meet the needs of the project.

Designing

Work will include architecture design, integrating graphical content and sometimes developing such, and/or programming provided UI designs.

Thank you for doing business with us.

Thinkers Technologies Company Limited

Kinondoni Mjini Street, Block 40 Plot No. 4 - Dar-es-salaam, Tanzania

Teamwork

Work alongside software development and test engineers as part of Thinkers Tech process of building products through design thinking process.

Training

Even the most experienced developers in this position will have the opportunity to expand and improve their skill sets in many advanced areas of knowledge within Thinkers Technologies supports such trainings to foster your growth.

QUALIFICATIONS

- Background in computer science, information systems, information technology, computer engineering, software engineering or related IT discipline.
- Strong technical skills including understanding of software development principles and self-initiative in problem solving
- Bachelor's degree is not a necessary requirement, if you know programming contact us
- Willing to live and work within Dar es salaam, Tanzania
